

AIDI KHALID

Software Developer with 2+ years of experience building web applications, backed by 11 years in the game and animation industries. Worked on award-winning titles including *Baldur's Gate* and *No Straight Roads* in creative development roles, and led a team to win first place at the IPCC 2011, a national creative media competition. Experienced in full-stack development, software design, and problem-solving.

Professional Experience

Co-Founder

Lexinomi | Now 2025 – Present

- Co-founding Lexinomi, an AI-powered language learning platform with a conversational tutor.
- Expanded the core application architecture by refactoring the Next.js codebase into a modular, scalable structure and integrating Paddle for subscription billing.
- Implemented a "Lesson Brain" to handle deterministic conversation logic, reducing reliance on LLMs for non-generative tasks and minimizing hallucinations.
- Enhanced the AI tutoring system, introducing a modular lesson model (Scenarios + Teaching Styles), multilingual support, and a 30-level CEFR-based proficiency engine with dynamic difficulty bands and LLM-driven conversational lessons.

Front-End Developer

Mir Tech | Jan 2024 – August 2025

- Developed and shipped new features for Jensi, a project management application, improving usability and overall user experience.
- Built client homepage websites. Leveraged prior creative experience to design UI components aligned with project requirements, reducing design workload and accelerating delivery.

Cinematic Artist

Larian Studios | Jun 2021 – Feb 2023

- Collaborated with cross-functional international teams to produce in-game cinematics for *Baldur's Gate 3*, contributing to the delivery of a critically acclaimed and globally successful title.
- Contributed to the cine-feasibility team by evaluating narrative for visual and technical viability, streamlining cinematic production and enabling more efficient implementation by the team.
